ALMS Contract Awarded

NEWPORT NEWS, Virginia. – The U.S. Army Program Executive Office Enterprise Information Systems (PEO EIS) recently announced that International Business Machine, INC (IBM) has been awarded a contract to acquire the services and materials to sustain and operate the Army Learning Management System (ALMS). The ALMS is part of the portfolio for Product Manager Army Training Information System (PdM ATIS). The contract has a total expected value of \$26.7 million over the course of 57 months.

The ALMS streamlines, consolidates, and provides a centralized point of delivery to accomplish the Army's training processes. The ALMS builds upon ATIS's supporting infrastructure and utilizes Department of Defense (DoD)-managed common user networks to implement a comprehensive, automated system for administering Army training throughout the Force.

"We have been working with IBM for over ten years. The work that they do to help us keep the ALMS running is essential to our Soldiers and their training needs," said Lt. Col. Jim Lee, product manager for ATIS.

The ALMS also manages training activities from initial entry and continue throughout a Soldier's service. The system also provides course and training resource management, scheduling and registration functions, courseware distribution, delivery, and storage and permanent record keeping of training activities and results.

IBM is a global technology company that provides hardware, software, cloud-based services and cognitive computing.
