

Army Training Information System (ATIS)

What is ATIS?

ATIS is designated a Defense Business System (DBS) that will develop, integrate, test, deliver, operate and maintain an enterprise capability for the Army training and education communities.

ATIS Capabilities:

- Training Development - Provides centralized access to training information anytime, anywhere including educational and professional instruction
- Training Management - Provides centralized ability to access and manage information, including individual and collective/unit training that supports mission tasks and individual training records
- Enterprise Scheduling - Provides a single integrated set of applications to schedule training resources, including transportation, classrooms, ranges, supplies and mandated legal/social individual and unit training
- Content Management - Create, manage and deliver training content across digital channels
- Resource Management - Provides ability to manage availability/sustainability of training enablers and resources such as TADSS

ATIS will enable:

- Army trainers the capability to identify and respond rapidly to the threat-based training requirements of commanders and Soldiers in the Common Operating Environment (COE)
- A Single-entry, integrated system, comprised of any combination of Commercial Off-the-Shelf (COTS) and/or Government Off-the-Shelf (GOTS) and/or existing products and services
- A Common Operational Picture (COP) of the Army training environment in five integrated and interoperable capability areas
- Commanders, leaders, Soldiers and civilians of all Army components to plan and prepare for operational, institutional and self-development training
