

Range Facility Management Support System - RFMSS

WHAT IS RFMSS?

RFMSS is a CAC enabled, web-based range management application that provides a standard, integrated system to efficiently assist installation commanders in providing training support for units and schools to manage training ranges at Army, ARNG, USAR, Navy and USMC installations.

WHAT DOES RFMSS DO?

RFMSS maximizes the capability, availability and safety of ranges to support doctrinal requirements, mobilization and deployments. Authorized for use in AR 350-19 and AR 385-63.

RFMSS SYSTEM CAPABILITIES

- Manages maintenance of range facilities, training areas and devices
- Monitors air and ground safety
- Provides range management activities
- Provides real-time situational awareness with Enhanced Graphics Fire Desk
- Provides facility, equipment and conflict mitigation (safety, scheduling, air to ground, ground to air, environmental, weapon to event, etc.)
- Provides facility, equipment and accessories scheduling
- Provides range/airspace utilization data
- Supports training, mobilization and deployment
- Supports Soldier qualification and certification training
- Uses ArcGIS to display Safety Danger Zones and Weapon Danger Zones

MISSION

Our mission is to serve as the lead agent to HQDA DCS G3/7 and to train, equip and support Army-wide range operations in the four core functions: scheduling, management, maintenance, and range safety.
